SKILLS

TECHNICAL

Python
TypeScript
SQL
FastAPI
NestJS
Node.js
REST APIs
PostgreSQL
Redis
LangGraph
LangChain
RAG & AI agents
LLM fine-tuning

SOFTWARE

AWS
Docker
Git and GitHub
TensorFlow
PyTorch

EDUCATION

SOFTWARE DEVELOPMENT

ELEV8, MICROSOFT
2022

AWS RE/START

AMAZON WEB SERVICES
2021

MS, MATHEMATICS

UNIVERSITY OF IBADAN
2018 - 2021
Dissertation: Optimizing Deep Neural
Networks and Classifying Plant Disease
using ConvNets

BS, MATHEMATICS

FEDERAL UNIVERSITY OF
AGRICULTURE, ABEOKUTA
2011 - 2015

EXPERIENCE

AWALEDGER | BACKEND ENGINEER

April 2025 – April 2026 | Remote

- Built FastAPI services that convert handwritten records into structured ledgers using Google Cloud Vision OCR and LangChain with OpenAI models.
- Designed asynchronous PostgreSQL, Redis, and Pub/Sub workflows; secured and operated them with OAuth2, JWT, signed URLs, Alembic migrations, structured logging, and pytest.

TOG LAB | BACKEND ENGINEER

August 2022 – March 2025 | Remote

- Architected and maintained NestJS microservices backed by Prisma-managed relational schemas and Redis-based session and chat persistence.
- Implemented authentication with AWS Cognito and event-driven handlers with AWS Lambda and S3, then automated delivery through AWS CodePipeline and AWS CDK.
- Built a RAG chatbot using LangChain, TypeScript, React/Next.js, and company content as the knowledge base.
- Engineered a multi-agent conversational AI workflow using Flowise AI and Pinecone, with Python ingestion pipelines built on Unstructured and LangChain.

HIIT PLC. | AWS CLOUD INSTRUCTOR

June 2022 – September 2022 | Remote

- Taught AWS compute, storage, networking, security, and database services to learners preparing for the AWS Cloud Practitioner examination.
- Led hands-on labs through the AWS Management Console and command-line interface to reinforce practical cloud skills.

RURAL FARMERS HUB | MACHINE LEARNING ENGINEER INTERN

Aug. 2020 – Oct. 2020 | Remote

- Annotated farmland boundaries from geospatial imagery in Google Earth for an automated farm-boundary detection project.
- Built Python preprocessing workflows for satellite imagery used by a convolutional neural network to map key soil nutrients.
